

PULIFUGHE

Detergent for deep cleaning of grouts and floor joints

F O C U S
professional and multifunctional products

EDILIZIA
RISOLVERE PER MEGLIO

DESTINATION ➔ Acid-resistant surfaces such as **cotto, gres, porcelain stoneware, clinker, unpolished natural stones**. Do not apply on delicate, polished and / or leaded stones or surfaces not resistant to acids.

PROPERTIES ➔ **PULIFUGHE** is a product specifically designed to effectively deal with the **cleaning of floor joints from the dirt** that accumulates in them. **PULIFUGHE is able to remove dirt of an inorganic nature** such as black deposits of dust, **calcareous encrustations and efflorescences**.

PULIFUGHE can also remove faint paint stains. Its cleaning action does not damage the materials that make up the flooring and guarantees a high cleaning efficiency, **bringing the joints back to their original appearance** after cleaning.

USE ➔ Before each intervention **the flooring must be perfectly dry**. **PULIFUGHE is ready to use**. In the case of light or not particularly stratified dirt, it can be diluted at 30/50% with water before application. Then apply **PULIFUGHE directly on the floor joints** and let it act for **2-5 minutes**. Support the cleaning action of the product using a **sponge or abrasive pad** (for cleaning large areas use a mop). Then **rinse the floor thoroughly with clean water** and remove all the cleaning residues with **paper or absorbent rags or vacuum cleaners**. Repeat the operation if necessary. It is advisable to protect any outdoor floor joints with the specific **DEFENDER S** water repellent protection **to prevent water infiltration**. The success of any subsequent protective treatments is determined by the **perfect cleaning**, by the **good rinsing** and by the **complete drying** of the support (about 2-3 days after washing).

Establish, by means of a test, the resistance of the substrate to the product as well as the possible dilution and methodology to be used, in order to avoid possible undesired effects.

YIELD ➔ Approximately **20-30 m²/l** of product.

TECHNICAL DATA

- ➔ **APPEARANCE:** clear, perfumed red liquid
- ➔ **pH:** 1 ± 0,5
- ➔ **SPECIFIC WEIGHT:** 1,08 Kg/l ± 0,1

PACKAGING

1CR077L075 ➔ 12 x 750 ml plastic **BOTTLE** (with sprayer)

SPECIFICATION ➔ Buffered concentrated acid detergent designed to specifically and effectively deal with the cleaning of grouts and floor joints of flooring made of acid-resistant materials (cotto, gres, clinker, unpolished natural stones and other acid-resistant substrates) from black dirt, dust residues, etc. (such as **PULIFUGHE** by CIR). It must effectively remove all types of inorganic dirt, possibly faint paint stains. The product must be dilutable according to the needs of use. The product in question must be accompanied by a 16-section safety data sheet as required by current legislation.

WARNINGS

- ➔ Product intended for professional use.
- ➔ Protect the surfaces to which the product is not intended.
- ➔ Equip the operators as required by current safety regulations.
- ➔ Ventilate the closed rooms properly when using the product.

All information contained in our records correspond to our best knowledge of current techniques and cannot be considered binding or challenging as the real application conditions, verifiable case, may also result in major changes of both practices described above and the results obtained. Perform preliminary tests to determine if the product is suitable for the intended or not. We decline any liability for any damage resulting from improper use or misuse of the product. Do not litter in the environment. This data sheet replaces all previous versions.
