

# DECERSOLVENTE EXTRA

Strong wax remover for floorings

**DESTINATION** → Cotto flooring, natural stone and industrial cement. Do not apply on surfaces that are not resistant or sensitive to solvents.

**PROPERTIES** → **DECERSOLVENTE EXTRA** is a product that guarantees **high dewaxing power** and is based on **specific solvents with high dissolving power**, designed to remove various treatments (finishing waxes, acrylic or paste, waxy, acrylic-waxy, polymeric treatments), of high resistance and tenacity, not removable with common alkaline detergents.

**USE** → Before any intervention **the flooring must be perfectly dry**. Apply the pure product, with a **brush or rag**, starting from the bottom of the area and **treating small surfaces at a time** (3-4 m<sup>2</sup>). Leave the product to react for approximately 10 minutes, then **work the surface vigorously with an abrasive pad and/or single-disc machine equipped with a brown or black pad** for a few minutes. **Subsequently remove the washing residues** using a liquid vacuum cleaner and/or absorbent paper, in order to prevent it from settling again. If further dirt residues are present and evident, repeat the operations described above. The effectiveness of the subsequent treatment is determined by **perfect cleaning, good rinsing and complete drying** of the floor (approximately 5-6 days) after cleaning with **DECERSOLVENTE EXTRA**.

Establish through preliminary testing the resistance of the support to the product as well as the right application methodology to use, in order to avoid possible unwanted effects.

**YIELD** → As an indication, **5-10 m<sup>2</sup>/l** of product.

## TECHNICAL DATA

- ➔ **APPEARANCE:** transparent colourless liquid
- ➔ **SPECIFIC WEIGHT:** 1,00 Kg/l ± 0,1

## PACKAGING

- 1CR240L1** ➔ 12 x 1 liter plastic **BOTTLE**
- 1CR240L5** ➔ 2 x 5 liters plastic **TANK**

**SPECIFICATION** → Detergent with a strong dewaxing action based on specific solvents, specifically designed to address the problems of removing various treatments (finishing treatments with acrylic or metallic waxes), of uncertain nature and/or of particular resistance from cotto, bricks, natural stones and industrial cements (such as **DECERSOLVENTE EXTRA** by CIR). It must be usable pure and in association with **BASICO** alkaline cleaner, it must be easily applicable with a brush or rag. The product in question must be accompanied by a 16-section safety data sheet as required by current legislation.

## WARNINGS

- ➔ Product intended for professional use.
- ➔ Carefully protect surfaces for which the product is not intended.
- ➔ Do not apply in conditions of high humidity, imminent rain or in full sun conditions.
- ➔ Do not smoke or use open flames during application.
- ➔ Equip operators as required by current safety regulations.
- ➔ Adequately ventilate closed rooms when using the product.

All information contained in our records correspond to our best knowledge of current techniques and cannot be considered binding or challenging as the real application conditions, verifiable case, may also result in major changes of both practices described above and the results obtained. Perform preliminary tests to determine if the product is suitable for the intended or not. We decline any liability for any damage resulting from improper use or misuse of the product. Do not litter in the environment. This data sheet replaces all previous versions.
