

PAV LUX

Neutral maintenance-polishing cleaner for polished or protected floors.

DESTINATION ➔ Floorings in general. Glossy floors or previously treated with metallised finishes or waxes.

PROPERTIES ➔ **PAV LUX** is a **neutral maintenance cleaner** consisting of a pine scented aqueous solution composed of **surfactants** with different ionic charge and solvents, designed for the **cleaning and maintenance of floorings in general**, polished or treated with finishes.

It effectively and quickly **removes dirt from protected surfaces**. **PAV LUX** has a special polishing power and it can be used with a **single disc** for the polishing of waxed surfaces, even with the "Spray-Cleaning" method. It also performs an **anti-static action against dirt**.

USE ➔ Dilute the product at a concentration **between 2 and 5% of product in water**, possibly increasing it according to your needs. Wet the flooring with the solution thus obtained and subsequently intervene with a **single disc, rag or mop to remove any dirt**. Remove everything with **wet vacuum cleaner** or dry rags. To increase the brightness of the flooring and obtain a polishing effect, apply the product diluted on the flooring by washing it with a mop or floor machine. **No need to rinse**. **PAV LUX** can also be used **directly in the single disc tank** for the "Spray-Cleaning" application method: in this case, increase the product concentration up to 10/15%. In any case, wait for the complete drying of the flooring in order to evaluate the cleaning and / or polishing effectiveness obtained.

YIELD ➔ For indicative purposes, **10-20 m²/lt** of diluted solution.

TECHNICAL DATA

- ➔ **APPEARANCE:** clear pink liquid, pine scented
- ➔ **SPECIFIC WEIGHT:** 1,00 Kg/l \pm 0,1

PACKAGING

- 1CR055L1** ➔ 12 x 1 liter plastic **BOTTLE**
- 1CR055L5** ➔ 2 x 5 liters plastic **TANK**

SPECIFICATION ➔ Neutral maintenance-polishing cleaner designed for the daily maintenance of surfaces in general (also previously treated with metallised finishes or waxes) and for their final polishing (such as **PAV LUX** by CIR). The product must be dilutable in water as needed. The product must not alter any treatments already present on the flooring in any way. It must not contain acids or strong alkalis, alcohol, ammonia or varechin. The product must be able to be inserted inside a monobrush and / or scrubber-dryer. The product in question must be accompanied by a 16-section safety data sheet as required by current legislation.

WARNINGS

- ➔ Product intended for professional use.
- ➔ Protect the surfaces to which the product is not intended.
- ➔ Equip operators as required by current safety regulations.
- ➔ Storage temperatures: +5 °C / +35 °C

All information contained in our records correspond to our best knowledge of current techniques and cannot be considered binding or challenging as the real application conditions, verifiable case, may also result in major changes of both practices described above and the results obtained. Perform preliminary tests to determine if the product is suitable for the intended or not. We decline any liability for any damage resulting from improper use or misuse of the product. Do not litter in the environment. This data sheet replaces all previous versions.
