

SMACCHIATORE RAPIDO

Spray stain remover for floorings and porous materials such as cotto, bricks, stone and concrete

DESTINATION ➔ Floorings and surfaces in cotto, bricks, clinker, natural stone, industrial cements, also polished. Do not apply on surfaces that are not resistant and / or sensitive to solvents.

PROPERTIES ➔ **SMACCHIATORE RAPIDO** is a stain remover in spray can, formulated for the elimination of greasy and oily stains absorbed or penetrated deep into the porosity of absorbent or polished surfaces, not removable with common detergents.

The combined action of solvents and diatomaceous earth makes it possible to extract any residual oil, greasy stains, etc., even old or deeply penetrated, without leaving residues or halos. **SMACCHIATORE RAPIDO** can be used both on untreated and treated surfaces: in the latter case, once the stain has been cleaned, it will be necessary to restore the protective treatment.

USE ➔ Apply the product only on dry surfaces, free from other types of dirt. **SMACCHIATORE RAPIDO** is ready for use. Shake the can well and spray the product from a distance of 15/20 cm, keeping the can tilted 45 degrees above the stain, trying to spray the product in a spiral pattern in order to ensure an uniform and even coat. Apply an amount necessary to create a slight stratification over the stain (at least 1/2 mm thick) according to the difficulty of the stain. Then wait until the white powder is completely dry (at least 30/40 minutes). Carefully vacuum the residual powder, if necessary rub the affected area with a wet sponge to remove all powder residues, and evaluate the effectiveness of the intervention. Repeat the operation if the stain has not been completely eliminated or superficial halos remain. Carry out preliminary tests on the surface to be cleaned in order to avoid possible unwanted effects.

N.B: on very absorbent materials or if the stains are old, it will be necessary to apply a thicker layer of product and possibly take several subsequent applications to obtain a good final result.

YIELD ➔ As an indication, 10-15 applications per can. Yield may vary based on the material. Up to 15 applications can be carried out on smooth, treated or slightly porous substrates, with stains of about 6-7 mm in diameter. On extremely absorbent substrates (e.g. cotto or bricks) that are not treated or protected, the yield can be reduced by up to 10 applications per can.

TECHNICAL DATA

➔ **APPEARANCE:** aerosol / spray can

PACKAGING

1CR502L02 ➔ 12 x 200 ml SPRAY CAN

SPECIFICATIONS ➔ Spray stain remover for the removal of greasy and oily stains absorbed in the porosity of surfaces and / or floorings in cotto, bricks, clinker, natural stone and industrial cements (such as **SMACCHIATORE RAPIDO** by CIR). It must allow to extract any oily residue, even old or deeply penetrated, without leaving residues or halos. The product must be accompanied by a 16-section safety data sheet as required by legislation in force.

WARNINGS

- ➔ Product intended for professional use.
- ➔ Operating temperatures from + 5 °C to + 35 °C
- ➔ Do not apply in conditions of high humidity, impending rain and in full sun conditions.
- ➔ Carefully protect the surfaces for which the product is not intended.
- ➔ Do not smoke or use open flames during application.
- ➔ Equip the operators as required by current safety regulations.
- ➔ Properly ventilate closed rooms while using the product.

HAZARD AND PRECAUTIONARY STATEMENTS

HAZARD STATEMENTS "H": H223 Flammable aerosol. H229 Pressurized container: may burst if heated. H319 Causes serious eye irritation.

PRECAUTIONARY STATEMENTS "P": P210 Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking. P251 Do not pierce or burn, even after use. P410+P412 Protect from sunlight. Do not expose to temperatures exceeding 50 °C/122 °F. P102 Keep out of reach of children. P211 Do not spray on an open flame or other ignition source. P101 If medical advice is needed, have product container or label at hand. P305+P351+P338 IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. Product not intended for the uses envisaged by EC Directive 2004/42.

All information contained in our records correspond to our best knowledge of current techniques and cannot be considered binding or challenging as the real application conditions, verifiable case, may also result in major changes of both practices described above and the results obtained. Perform preliminary tests to determine if the product is suitable for the intended or not. We decline any liability for any damage resulting from improper use or misuse of the product. Do not litter in the environment. This data sheet replaces all previous versions.
